

FELLOWSHIP IN NEONATOLOGY

The course is accredited by **Medical Council of India**

Rela Institute and Medical Centre's had the passion to start Neonatology Department and PERINATAL CENTRE in Chennai with a goal of providing quality care.

Neonatal Intensive Care (NICU) is situated in second floor, close to Labour ward / operation theatre. Our team consist of experienced consultants, associate consultant, and neonatal fellows who available round the clock to care extreme preterm and sick babies. Neonatal life-threatening congenital anomaly and will be handled our surgical team including Paediatric surgery and Cardiothoracic team. We provide neonatal transport for safe transfer of sick babies within hospital is in Chennai. We take care all high risk mother and foetus, give antenatal counselling, do detailed scans done by foetal medicine specialist.

Perinatal Centre: Our Regionalized perinatal care integrates delivery of services for the woman before and during pregnancy, the management of labour and delivery, postpartum care, and neonatal care. The perinatal health care system is oriented toward providing patient-centred and family-centred health care because the family often is the primary source of support for individuals receiving health services.

OUR STRENGTH

- Care of extreme premature and low birth weight babies
- Non-invasive ventilation, conventional ventilation
- HFOV, I inhaled (NO), therapeutic Hypothermia (Whole body cooling) and ECMO

- Management of all neonatal surgical problems (congenital diaphragm Hernia, Tracheo oesophageal fistula and others)
- Resuscitation team available for in house and surrounding birthing centres (24x7), all holidays
- CPAP, Phototherapy, exchange transfusion and Total Parental nutrition are commonly done

OUR SPECIALITY

- Family Centered Neonatal Care
- Neonatal Neuro Critical Care

OUR TEAM

Rela's Department of Neonatology provides around-the-clock care to critically ill new-borns and premature infants. As part of one of the top-ranked paediatric hospitals in Chennai, we provide specialized care for children with a multitude of complex diseases, seamless access to any specialty services needed, and the full complement of surgical approaches for new-borns and infants.

Our Team can assure that the trainee will get exposure to all Neonatal Speciality and daily bedside class. Presence in Neonatal Conference. After completion of the program, the trainer will be confident to serve the sick newborn.

- Dr. T. Eswara Raja - Clinical Lead & Senior Consultant
- Dr. M.P. Venkatesh - Consultant, Dept. of Neonatology
